transponders*

Program new key fob transmitters

Clear lost key fob transmitters

Immobilisation set-up

*X 300 - Oxygen sensor orientation
Throttle pot adaption
Pedal position*

Complete coverage

Autologic® for Jaguar is a new diagnostic tool uniquely designed to replicate the functionality of the tools used by the manufacturer's dealers. It enables independent garages to provide comprehensive servicing for Jaguar vehicles in their own workshops without having to rely on dealer availability.

The system offers total diagnostic coverage of all engine, chassis and body systems on all XJ, XK, S and X models. Continual development will provide additional coverage and software improvements will become available as Internet download modules.

Complete technical support

Autologic® for Jaguar users have free access to our Vehicle Technical Support team, staffed by factory-trained Master Technicians with a combined total of 50 years main dealer experience between them. Instant professional help is only a phone call away.

Complete software support

Autologic® is unique in the diagnostic world in having a built-in data logger which has the capability to record any software bugs or unidentified ECUs and email the details to the appropriate software developer at Diagnos. Internet communication with the Autologic® system enables a fix file to be created and mailed back to the user, usually the same day. A new software version is then created and posted for all users to download. All software revisions and upgrade modules are available free, during the warranty period, via the website. The Autologic® data logging facility ensures constant software improvement with the minimum of inconvenience to the user - no waiting for new CDs, pods or cartridges. Autologic® is a truly 'live' diagnostic tool.

Additional software

Dealer level software is also available for BMW, Mercedes Benz and Land Rover vehicles and has been designed to run on the same platform as Autologic® for Jaguar, offering our customers an extended servicing capability and great value for money.
