**Complete
independence**

autologic®
Independent
Vehicle
Diagnostics

Autologic® offers

- Complete coverage
- Total portability
- Instant software updates
- Free support
- Free installation & training
- 1 year warranty
- Cost effective finance

Complete coverage

The system offers total diagnostic coverage on all engine, chassis and body systems on all 800, 900, S/V40, S/V/C70, S/V90, S60, S80, V50, XC70, XC90 models.

Complete technical support

Autologic® for Volvo users have free access to our Vehicle Technical Support team, staffed by factory-trained Master Technicians with a combined total of 50 years main dealer experience between them. Instant professional help is only a phone call away.

Complete software support

Autologic® is unique in the diagnostic world in having a built-in data logger which has the capability to record any software bugs or unidentified ECUs and email the details to the appropriate software developer at Diagnos. Internet communication with the Autologic® system enables a fix file to be created and mailed back to the user, usually the same day. A new software version is then created and posted for all users to download. The Autologic® data logging facility ensures constant software improvement with the minimum of inconvenience to the user - no waiting for new CDs, pods or cartridges. Autologic® is a truly 'live' diagnostic tool.

Additional software

Dealer level software is also available for BMW, Mercedes Benz, Jaguar and Land Rover vehicles and has been designed to run on the same platform as Autologic® for Volvo, offering our customers an extended servicing capability and great value for money.

Service **with confidence...**

Reading and re-setting diagnostic trouble codes (DTC)

Real time reading of dynamic data

Full component activation

Configure new modules

Configure existing Engine and Transmission module

Program new modules
(some may incur a charge)
